TUBERS

Columbia White Asparagus.

German, Spargel; French, Asperge; Spanish, Esparrago.

Sow the seed early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds, which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.
"Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.
"In planting for private use, set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.
"If the plot is made sufficiently rich when the plants are set, they will make a large growth the first summer, and the shoots may be cut from them the succeeding year. Any well treated plot ought to produce a moderate crop the second year after planting. Remove the dead brush late in the fall or early in the spring of each year, and apply broadcast a dressing of manure. A plot of Asparagus will reach its maturity in its fifth or sixth year, after that the size of the shoots will diminish, but their numbers will increase."

## BEA NS-English or Broad.

German, Garteubohne; French, Feve de Marais; Spanish, Hava. Per qt. Per peck

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart and two inches deep, in drills four feet apart. To insure well-filled pods, pinch off the top as soon as the lower pods begin to set.

> BEANS-Bush or Snap Varieties.
> German, Bushbohnen; French, Haricots nains; Spanish, Habichuelas enanas.

Burpee Bush Lima Beans.
are round, full, stringless and of very fine quality
BURPEE'S BUSH LIMA-Beans as large as Large Pole Lima; stout growth, branches vigorously, bearing 50 to 200 large nods well filled with very large beans.

VILMORIN'S IMPROVED SUGAR BEET, an improved variety. . ................
LANE'S IMPROVED SUGAR BEET, improved variety of the French Sugar Beet, obtained by careful selection in this country.
A rich, deep, open soil is the best suited to the culture of Beets; fresh manure is undesirable land that has been well manured the previous year is highly suitable. For an early supply sow in spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand, in the cellar or outhouse. Before storing leaves and fibres must be trimmed off, but care must be taken not to bruise the main root.

## BRUSSELS SPROUTS.

German, Sprossen-Kohl; French, Chou de Bruxelles; Spanisñ, Berza de Brusels.
IMPROVED SEED, (French)
Per oz. $1 / 4 \mathrm{lb}$. Per 1 b . • DWARF IMPROVED, a variety producing compact sprouts of excellent quality. . $\quad 20 \quad 60 \quad 2 \quad 00$

A tender and delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbages. The leaves, which look like the Savoy, should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May; transplant and cultivate like the cabbage.

BROCCOLI.
German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.
EARLY WHITE, heads medium size, compact, creamy white color, most certain to head ................................................................. . . . . . . . .

A favorite European vegetable, nearly allied to the Caulifiower, but more hardy and surer to head; the seed should be sown in this district in the early part of May, and transplanted in June, farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

## CABBAGE.

German, Kopfkohl; French, Chou; Spanish, Berza de reppollo.
ETAMPES, early French variety, with pointed heads

FOTTLER'S IMPROVED BRUNSWICK, This is a very fine second early variety
HENDERSON'S SUCCESSION, a second early and late variety, a sure header; seeds sown in March produce large heads in June.

#### Abstract

\section*{CABBAGE-Continued.} 

For very early use plant in the autumn, from 10 th to 25 th September, in a seed-bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring as soon as the soil will admit. For autumn and winter use, plant in the seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in heat early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

## CARROT.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop, such as Celery, Potatoes, Onions or Peas, but avoiding such crops as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Cauliflower delights in a rich, moist soil, and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seeds in the hotbed in January or February and transplanting the plants at two to three inches apart in boxes, or in the soil of another hotbed, until such time as they are safe to be planted in the open ground, which, in this latitude , is usually from the 15 th of March to the 10 th of April. If properly hardened off, they are seldom injured by being planted out too early.

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done
 by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting, June and July; the tops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots; keep free from weeds until the plants are able to take care of themselves. Earth up gradually during their growth, keeping the leaf stalks close together, so that the soil does not get between them. The soil best suited for Celery is a rich, moist loam.

## COLLARDS-Georgia Grown.

German, Blatter-Kohl; French, Chou Cabu;
Spanish, Cabu.

$15 \quad 50 \quad 150$ It is grown exclusively for pickling, and should always be pickled when young and tender

Cucumbers succeed best in warm, moist,

Cucumbers. rich loomy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelfull of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. The fruit should be plucked when large enough, whether required for use or not, as if left to ripen on the vines, it destroys their productiveness.
ENGLISH FRAME CUCUMBER-Per pkt., 25 cts.
IMPROVED SION HOUSE. TELEGRAPH. GIANT OF ARNSTADT. DUKE OF EDINBURGH. GEN. GRANT. LONG GUN. CARTER'S TENDER AND TRUE. SWAN NECK. BLUE GOWN.
These varieties are for growing in hotbeds, or in houses particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in November, December or January, according to the time they.are wanted for market, taking care to give plenty of air and water. It will be necessary to fertilize the pistillate flowers with the staminate in order to render the vines productive, as owing to the absence of insects they will not produce a crop under glass the same as in the ground, where bees and other insects have free access to the flowers.

Dandelion.

## DANDELION.

German, Pardelblume; French, Pisse en-lit; Spanish, Armagon.

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

## ENDIVE or CHICORY.

German, Endevien; French, Chicoree; Spanish, Endivia.

|  | P | 1/4b. | Per 1b. |

| BKOAD-LEAVED BATAVIAN (Escarolle), chiefly used in soups and stews; requires to be tied up for blanching. | 15 | 40 | 125 |
| EARLY WHITE CURLED (Self-Blanching), the best variety, grows to a large size; very large and tender. | 20 | 60 | 200 |
| MOSS CURLED EARLY SUMMER, used for salads same as winter varieties | 15 | 50 | 150 |

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no especial soil or manure, and after planting is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is effected by gathering up the leaves and tying them by their tips in a conical form with bass matting. This excludes the light and air from the inner leaves, which in the course of three to six weeks, ac-

Green ${ }^{\circ}$ Curled Endive. cording to the temperature at the time, become blanched. Another and simpler method consists in covering up the plants as they grow, with slats or boards, which serves the same purpose by excluding the light as the tying up.

## EGG PLANT.

German, Eiepflanze; French, Aupergine; Spanish, Berenfiena.

New York Egg Plant.

Per oz. $1 / 4 \mathrm{lb}$. Per 1 b . PEARL WHITE, very fine grain and well flavored. . $\begin{aligned} & 0 \\ & 3\end{aligned} 0 \$ 0 \quad 85 \$ 300$ (Per pkt., 10c.)

85300
The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hotbeds, or if these are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

# KALE. <br> German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in spring, in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for Cabbage. Of all the Cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

## SEA-KALE. <br> German, Seekohl, Meerkohl; French Crambe Maritime; Spanish, Breton de Mar.

## SEA-KALE SEEDS, very much like Celery $\begin{array}{llllll}\$ 0 & 25 & \$ 0 & 75 & \$ 2 & 50\end{array}$

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

Early Vienna Kohl-Rabi.

## KOHL-RABI.

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

EARLY WHITE VIENNA, flesh white and tender; best market sort; good for table use $\begin{array}{llllll}\$ 0 & 20 & \$ 0 & 60 & \$ 2 & 00\end{array}$
EARLY PURPLE VIENNA, differing from the above in col-
or, which is of a bluish purple
$20 \quad 60 \quad 2 \quad 00$
Kohl-Rabi, or Turnip-stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb somewhat resembling a Turnip; this again is crowned with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is veryhardy, withstands severe drought, and is a good keeper. Cultivate the same asCabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

## LEEK.

German. Lauch; French, Poireau; Spanish, Puerro.
Per oz. $1 / 4 \mathrm{lb}$. Per 1 b .

LARGE AMERICAN FLAG, the kind mostly grown for market
$\begin{array}{llllll}\$ 0 & 15 & \$ 0 & 40 & \$ 1 & 25\end{array}$
LARGE CARENTAN, a large-growing French variety of excellent quality.

| 15 | 35 | 1 | 25 |

 Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach, and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March, and transplant as soon as the ground can be worked. Later sowing may be made in the open ground for succession as long as the weather permits; thin out well, or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

## MARTYNIA.

A strong-growing annual plant, bearing curiously shaped seed pods, which when young and tender, make excellent pickles. Sow in the open ground in May, and thin out the plants to two or three feet apart, or a few seeds may be sown in a hotbed and afterwards transplanted. Per oz., 25 c .; Qr. 1b., 75 c .; lb., \$2.50.

## MELON, WATER-Continued.

Plant in hill as directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

## MUSTARD.

German, Senf; French, Moutarde; Spanish, Mostaga.

|  | Per oz. | 1/4b. | Per 1b. |
| :---: | :---: | :---: | :---: |
| WHITE LONDON, best for salads. | \$0 05 | \$0 10 | \$0 25 |
| BLACK, used for cooking and for salads | 05 | 10 | 25 |

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowings of it, as it should be cut and used in a very young state, even before the first rough leaf has appeared. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade, and should then be watered through the fine rose of a watering pot, without having any soil placed upon it; but the bed should be covered for a few days with a piece of cloth or mat, and in the course of six or eight days the Mustard will be fit for use, and should be cut close to the surface of the soil with a sharp knife; and no soil having been placed over the seeds, it will be found clean and free from grit.

## MUSHROOMS.

German, Champignonbrut; French, Champignon; Spanish, Hongo.
IMPORTED ENGLISH SPAWN
15 c . per lb.; $10 \mathrm{lbs} ., \$ 1.00 ; 100 \mathrm{lbs} ., \$ 9.00$ IMPORTED FRENCH SPAWN.

3 lb. box, $\$ 1.20$
Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where a temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse dropping add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of the dimensions required. Be careful that your heap is under cover, so that it can not possibly get wet.

The most convenient size for a bed is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn, two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately, and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

## NASTURTIUM.

German, Nasturtiam; French, Capucine; Spanish, Maranuela.

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its beautiful scarlet and orange-colored flowers, which appear freely all summer, add a charm to the garden.

## ONION.

German. Zweibel; French, Wignon; Spanish, Cebolla.

Yellow Globe Danvers Onion.

## Italian Varieties.

Barletta Onion.

The Onion thrives best in a rather strong, deep, rich, loamy soil, and, unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent hoeing, taking care not to stir the soil too deeply nor to collect it about the growing bulbs.

Potato Onion Sets.

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is of the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

## PARSLEY.

German, Petersilie; French, Persil; Spanish, Perjil.

EXTRA DOUBLE CURLED, a fine dwarf
variety, excellent for garnishing....... $\$ 010$ \$0 $20 \begin{array}{llllll} & \$ 0 & 50\end{array}$ FERN LEAVED, the most beautiful form of Parsley, resembling crested fern or moss in its growth.

Per oz. $1 / 4 \mathrm{lb}$. Per lb moss in, leaves plain, hardier than the curled

Should be sown very early in spring in beds or in lines, and the seeds, which are somewhat slow to vegetate, should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid dis-

Moss Curled Parsley. turbance to the seeds when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

## PARSNIPS.

German, Pastinake; French, Panais; Spanish, Chirivia.

|  | Per 0 | 1/4 1 b . | Per 11 |

HITE MARROWFAT, an old and favorite sort for market, 4 feet $\ldots \ldots$. STRATAGEM, mammoth pods, well filled $\begin{array}{lllllll}35 & 1 & 25 & 2 & 25 & 8 & 50\end{array}$
Peas come earlier to maturity in light rich soil. For general crop a deep rich loam, or strong loam, inclining to clay, is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crops a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two to three feet apart, according to the variety. When grown in small quantities, for private use, they are generally sown in double rows six or eight inches apart and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

## PEPPER.

German, Pefeffer; French, Piment; Spanish, Pimiento.

in heat and transplant when the weather is warm and settled; or sow in warm situation in the garden about middle of May. Plants should be set a foot and a half apart.

## POTATOES.

Houlton, Maine Potatoe, "The Queen."

## POTATOES-Continued.

HOULTON EARLY MAINE, Early and good yielder
HOULTON BLISS TRIUMPH, red skin, very early and productive
HOULTON HEBRON, white skin, the most popular variety in cultivation.
HOULTON ROSE. The Standard variety. Our specialties.
Prices on
HOULTON PEARL OF SAVOY, very early, cross be :ween Clark No. 1 and early Vermont application.
HOULTON EARLY QUEEN. Early and productive
HOULTON GREEN MOUNTAIN, late variety, good keeper, white and mealy
HOULTON IRISH COBBLER. A white potato of splendid quality; medium size, but run very evenly. Eyes strong and well developed; flesh white, mealy when cooked and of excellent flavor; very early, ripening before Early Queen. You will not be disappointed in this potato, which cannot be recommended too highly.
The foregoing varieties are grown for us at Houlton, Aroostook Co., Me., are the choicest stock ever offered. Coming from the extreme northern part of Maine, and raised without the aid of manure, causes them to have very strong eyes and to be hardy and very smooth. Productiveness unsurpassed. The following are raised for us in Washington County, northern New York:
THORBURN, very early, very productive.
RURAL NEW YORKER، No. 2.

WHITE SPANISH, long, rather milder than Black
WHITE STRASBURG, very large, German sort
There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all Winter. The Summer Radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in a light, rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The Winter varieties may be sown from the latter part of July to the middle of September.

## RHUBARB.

PRICKLY, prickly seeded, with triangular arrow-shaped leaves.............. . .
NEW ZEALAND, produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light, rich soil.
Sow in fall for spring use in drills a foot apart thinning out the plants to three inches
the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals during the season for succession.

## SALSIFY or OYSTER鳃PLANT.

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

# SCORZONERA-Black Oyster Plant. 

Salsify.

German, Schwarzwurzel; French, Scourge; Spanish, Escorzonera.

This vegetable requires the same treatment as Salsify, which it nearly resembles

$10 \quad 20 \quad 60$
Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hills for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

## TOMATO-Continued.

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart, in hills in which a good shovelful of rotted manure has been mixed. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

LONG WHITE FRENCH, an excellent sort either for table or stock WHITE, OR SWEET GERMAN, a large, solid variety
SHAMROCK, very large and solid, one of our choicest varieties
LAING'S MMPROVED, globe-shaped, with a small top and tap root
SKIRVING'S, an improved purple topped variety of large size

For the Spring crop, commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots to the depths of an inch or more, and give them a light dressing of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens, where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is importent to get them started very early, so that they may have time to grow of a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crop, sow from the middle of July to the last of August, in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast, though much larger crops are obtained by drill culture.

## SWEET POT AND MEDICINAL HERB SEEDS.

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as tie weather is warm, and thin out as the plants grow up; or the seeds may be sown under glass and the young plants afterwards transplanted to their respective beds. The perennial kinds should occasionally be divided and transplanted in Spring.
ANISE (Pimpinella anisum,) an annual, cultivated for its seed and its leaves, which are used for garnishing and for seasoning ..... $\$ 0 \quad 10$
BALM (Melissa officinalis,) a hardy perennial, used for making balm tea and balm wine. ..... 30

RED CLOVER, LARGE, OR PEA VINE. Price variable.
WHITE CLOVER, (Taifalium repens.)
ALFALFA OR LUCERNE, requires a deep, rich soil, and in such will produce several crops every season. Fifteen pounds to the acre.
ALSIKE, OR SWEDISH, (Trifolium hybridum.) Ten pounds to the acre........
CRIMSON OR ITALIAN, (Trifolium incarnatum,) sown in Autumn, it furnishes an early fodder, and is excellent for soiling. Twenty pounds to the acre. Price variable
BOKHARA CLOVER, (Melilotus alba,) affords excellent feed for bees, it is a valuable soiling plant; lasts two years. Ten pounds to the acre.

## How to Make a Lawn.

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to the depth of two or three inches. In March or April, before swoing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplishel, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of A pril to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing, the scythe should be used in preference to the machine. Frequent mowing and rolling are indispensable to maintain the turf in good order. By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake, and rolling afterwards. A slight dressing of manure, late in Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

## Meadow and Pasture Mixtures.

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high dry soil while others prefer plenty of moisture. Some mature so early and others so late there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or in fall, from Sept. to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

## MEADOW MIXTURES FOR ONE ACRE.

## No. 1. On Good Land, neither Too Dry or Too Wet.

Price $\$ 2.50$ per Bushel of 20 lbs . Sow 2 bushels to the acre.
No. 2. For High and Dry Land.
Price $\$ 2.90$ per Bushel of 20 lbs . Sow 2 bushels to the acre.
No. 3. On Wet Land.
Price $\$ 2.60$ per Bushel of 20 lbs . Sow 2 bushels to the acre.
PASTURE MIXTURES FOR ONE ACRE.
No. 4. On Good Land, neither Too Wet or Too Dry.
Price $\$ 2.80$ per Bushel of 20 lbs . Sow 2 bushels to the acre.
No. 5. On Dry Land.
Price $\$ 3.00$ per Bushel of 20 lbs . Sow 2 bushels to the acre.
No. 6. On Wet Land.
Price $\$ 2.80$ per Bushel of 20 lbs . Sow 2 bushels to the acre.

## Grains.

All grains are selected expressly for see 1 , and are strictly pure and true to name.

## SPRING WHEAT, 60 lb . Bushel.

SASKATCHEWAN FIFE
CHINA SPRING, chaff bearded variety, and a general favorite......................................
MEDITERRANEAN SPRING. This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties.
WHITE RUSSIAN. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 62 lbs. to the bushel. Has produced 40 to 50 bushels to the acre.

# GRAINS-Continued. <br> WINTER WHEAT, 60 lb . Bushel. 

JONES WINTER FIFE, surpassing all other varieties in hardiness and productiveness
GOLDEN CROSS, has the yield of the Clawson, with flour of the Mediterranean.
CLAWSON, also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other
FULTZ. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour
RED MEDITERRANEAN (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all
localities and ripens early

## OATS, 32 lb. Bushel.

SWEDISH, heavy and bright. color
WASHINGTON, very popular, and standing well until fully ripe.
Prices
PROBSTEIER, very productive and heavy. The straw is very strong. No. $32 \ldots$.
SCOTCH, one of the leading varieties.

QUANTITY OF SEEDS FOR A GIVEN NUMBER OF PLANTS, ETC.

## Cultivation of Flower Seeds. <br> HARDY ANNUALS.

Successive sowings may be made from March to the end of September; March, April and May are the best months for a general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine, dry earth-the smallest seeds needing but a mere dusting to cover them-and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

## HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these, a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose water pot.

Separate the plants when large enough to handle, and finally plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

Salvia Splendens.

Double Zinnia.

## HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and, in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autmun are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

HALF HARDY BIENNIALS AND PERENNIALS may be raised and treated in the same way as recommended for Half Hardy Annuals.

## ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the green house for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Sprin g,such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena, Vinca and others.

## General List of F lower Seeds.

## Abbreviations and Signs used in the following list.

A. Annual, refers to those plants that last but one season, and must be raised annually.
B. Biennial, raised one year, bloom and die the next.
P. Perennial, lasts two or more seasons.
h. Hardy, as those that may be grown at all seasons in open air, without protection.
hh. Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.
t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
cl. Climbing, as Cypress Vine, Morning Glory, etc.
spr. Spreading or trailing as Verbena.
g. Greenhouse, those plants which require to be grown under glass.
s. Shrubs, plants of a shrubby or bushy habit. THOSE BIENNIALS: AND PERENNIALS MARKE $D$ WITH AN ASTERISK (*) WILL BLOOM THE FIRST YEAR IF SOWN EARLY.

( Interesting climber, with remarkable fruits.
Beautiful new hybrids.
Fine for specimens or groups.
) Striking plants for greenhouse or outdoor cultivation.
Scarlet and orange tassel Unsurpassed for richness of coloring and beauty of shape.
C. Carpatica, fine for edgings.
C. pyramidalis, very handsome in pots.
A charming climber.
Beautiful and useful hardy annuals, very effective in beds, groups or ribbon borders; also for pot culture.

These stately plants are remarkable for their large and handsome foliage, producing a most luxuriant and tropical appearance.
) Handsome old-fashioned plants for mixed borders.
Ornamental Thistle.
) The Carnation Pink is indispensable for its rich flowers and delicious perfume.
Handsome silver foliage plants for bedding out of the greenhouse.
Showy annuals, for mixed beds or borders. Double Golden and Burridgei are very handsome. Chrys. indicum and pompon are beautiful Fall flowering Chrysanthemums.
) Superb strain; large flowers of beautiful form and color.
) New varieties, large double flowers.
Silvery foliaged bedding plant.

Free flowering fragrant perennials.

Stately plants, with large, handsome foliage; fine in groups or as single specimens.
Very showy.
Splendid free flowering ornamental plants.
Free blooming trailing plant.
Pretty, compact growing plant.
Sweet Scabiosa, very pretty, useful for bouquets.
Curious and interesting.
Charming dwarf compact plant
Charming greenhouse climber.
See Antirrhinum.
Ornamental fruit bearing plants, charming as pot plants.
Very beautiful hardy perennials
These much admired fragrant flowers are everywhere popular, their handsome spikes of double flowers lasting a long time in bloom. Desirable for pot culture or bedding. Seed may be sown at any time. For outdoor culture transplant when small; plant in rich soil, with mixture of lime and rubbish.

A beautiful and highly popular class of hardy annual climbers deliciously fragrant.
Verbena.

## BOWKER'S FLOWER FOOD

Feeds plants. A few grains dissolved in water will furnish a good many plants all they will need for two or three weeks. It contains fertilizing elements in a perfectly clean and soluble form. It is not a stimulant, but a perfect food for plants, concentrated and easily assimilable. It produces healthy foliage, abundant, rich, and bright-colored blossoms, and prolongs the period of blossoming. A pinch added to a vase of cut flowers will preserve their beauty and fragrance for at least forty-eight hours longer than if none were used. It also prevents the water from becoming stale.

## WATERING POTS.

[^1]
## The Success of Nitro-Culture.

## WHAT NITRO-CULTURE IS.

Nitro-culture consists of nitrogen collecting Bacteria which work in the soil and on the roots of leguminous plants, having the power to collect free nitrogen from the air and supply it to the plants. All plants need nitrogen, which is very costly when obtained through chemical fertilizers. The remarkable increase of crop frequently reported and caused by inoculation is due wholly to the large amount of nitrogen collected from the air by the Bacteria.

Method of Using. The Bacteria are furnished dried on absorbent cotton and can be readily forwarded by mail to any section of the country. Full directions accompany each package, which no farmer can have any difficulty in following out.

Value as Soil Renovator. It has been ascertained from the most reliable sources that the average inoculated leguminous crops such as Clover, Alfalfa, Vetch, Peas, Beans, etc., will not only under the proper conditions show an increase of crop, but also that the Bacteria will collect from the air and leave in the soil at the end of the season after the crop is harvested not less than 100 pounds of nitrogen per acre. This nitrogen at present market prices would be worth $\$ 15.00$ and upwards per acre, and would show a corresponding increase in the next succeeding crop, no matter what it may be.

Increase of Crop. It would be impossible for us to estimate what the increase caused by inoculation might be. Conditions vary in different sections. In some cases increases are reported to be very great, crops like Alfalfa, Clover, Vetch, Peas, Beans, etc., having been made to grow in sections where they had never been successfully grown hefore. We therefore, advise our customers to try the experiment and ascertain the true value of Nitro-Culture of their respective soils.

When ordering, state what particular crop you desire to inoculate. Crops mentioned on the same line, require the same Bacteria.

Alfalfa or Lucerne.
Red, Yellow or Mammoth Clover.
Alsike or White Clover.
Crimson Clover.
Burr Clover.
Cow, Clay, Whip-O'-Will, Black Eye Peas.
Garden Peas.

Garden Beans (Wax, String,
Lima, Pea or Kidney).
Soy Beans.
Velvet Beans.

Nitro-Culture cannot be furnished for any crops like corn, wheat, potatoes, cotton, etc., but only those which are mentioned on the above price-list. Inoculated clover may be planted with oats or other crops, and we have reason to believe that they will be benefited.

planted they will last a lifetime. The big hearted flower of June that everyone likes, in separate colors, Red White, Pink and Yellow.

We make our own importations of Bulbs direct from Holland, so we can offer to our customers the advantage of high grade Bulbs at low prices, not having to pay profits to any middleman, but purchasing from the growers direct. Our stock will include Hyacinths, in separate colors, than which ihere is nothing finer for beds and borders, also for winter blooming in the house. Tulips, both Single and Double, unequaled for color massing. Crocus in separate colors; the earliest flower to bloom, and can be planted anywhere. Narcissi (Daffodils) both Double and Single, in solid colors and variegated, fragrant and fine for forcing. Snowdrops, the beautiful pure white bells of which often push themselves up through the late snows. Oxalis, in various colors, than which there is nothing prettier for baskets, vases and pots. Easter Lilies-the fragrant beauties which are favorites in every home, and so easily grown.

California Privet, the premier hedge plant which is coming into use more and more every year, and deservedly so, as no other plant makes a handsomer hedge, and very easily kept in shape.

We can also furnish in their season Cabbage, Caultflower, Lettuce (Cold Frame), Pepper, Tomato and Egg Plants. Good strong plants and at very reasonable prices, which will be furnished on application.

## ROSES, BULBS AND PLANTS.

In the proper season for planting, we will have in stock fine two-year-old Rose plants of the leading varieties, hardy and ever bloomers, ready to produce a full crop of blooms the first summer. Hybrid Perpetuals, Hybrid Teas, Climbers, etc. They are chiefly distinguished for their vigorous growth, fine large flowers and for being entirely hardy. They are particularly valuable for permanent beds and borders in the Northern and Middle States. Many of them flower the entire summer; others flowering through the month of June, and again in August and September. The flowers are large, often measuring five to six inches in diameter, very fragrant, and of all the colors known to the Rose. Set the plants 15 to 18 inches apart, taking care to set the plants deeply, at least two inches above the first branches, pounding the soil firmly about the roots. We also carry in stock summer flowering bulbs; Gladioli; the easiest grown and most attractive summer flowering bulb. Invaluable for cut flower decorations; will last a week in vases. Dahlias-The oldtime favorites which have again come into favor. Fine field-grown roots. Tuberoses-A favorite with everyone. Caladiums (Elephant's Ear) One of the most effective plants in cultivation for planting out on the lawn, or in tubs. Paeonies-Once

# A General Fertilizer Suitable for Every Crop 

Stands ahead of anything in the market in Analysis, Selling Price and Results. The Great Satisfaction this Fertilizer has given our Customers, being so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

## MUZZY BROS." "SWIFT-SURE" PHOSPHATE best fertillzer ever manufactured.

## Guaranteed Analysis.

| Soluble and Precipitated Phosphoric Acid, 9 to 11 per |
| :---: |
|  |  |
|  |  |

## Muzzy Bros.' "Swift-Sure" Super-Phosphate FOR POTATOES.

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which, for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato Manure made from first-class material, like our "SWIFT-SURE" SUPER-PHOSPHATE FOR POTATOES, you can grow a larger crop of Potatoes than you can with barnyard manure, and have them smoother, freer from imperfections, and of more uniform size.

# GARDEN SEED DRILLS. 

"PLANET JR." No. 3.
MARKET GARDENER'S HILL AND SEEDER DRILL.

## Price - - $\quad \$ 10.00$

The Favorite among market sardenens, onion and seedsmen dropping at 4, 6, 8, 12 and 24 inches apart. Can be changed instantly to drill. The regulation in amount of seed is absolutely correct, and very simple to handle. Handles are adjustable in height, for man or boy.

"PLANET JR." No. 4.

HILL DROPPING SEED DRILL, HOE, CULTIVATOR AND PLOW. PRICE, COMPLETE. .$\$ 10.00$ " AS A DRLLL ONLY . . . . . . . . . . . . . 8.00
We are pleased to offer for 1906 a new combined tool of great excellence, which we can scarcely recommend too highly. It combines conveniently in a single garden implement a capital hill dropping and a continuous row seeder with the most perfect and complete wheel hoe, cultivator, rake and plow that the most practical can desire. Designed by a practical man, it is light, compact, durable and easy running, and does all its great variety of work with a thoroughness and perfection that has never before
 been attempted, much less equaled.

## No. 7, "PLANET JR." ALL STEEL HORSE HOE AND CULTIVATOR.

This Horse Hoe is the No. 8 without the depth regulator and with a slightly different lever wheel. It works the same as No. 8 in every way, except that it lacks the perfect steadiness and absolute control of depth made possible by the depth regulator.
No. 7 HORSE HOE, Price with attachments as in cut, $\$ 8.00$

No. 8 "PLANET JR." same as No. 7, with addition of depth regulator.

Price... . . . . . . . . . . . . . . . . $\$ \mathbf{8 . 5 0}$

No. 5, "PLANET JR." ALL STEEL HORSE HOE AND CULTIVATOR.

Practically the same imple ment as No. 7, except wheel lever; it is our leader.

Price
$\$ 8.85$

"PLANET JR." No. 1\%. CULTIVATOR AND LARGE GAR-
DEN PLOUGH. SINGLE WHEEL HOES.
SINGLE Wheel Hoes are lighter than the double, but do almost the same variety of work, though in a different way, being used mostly between the rows instead of straddling them. Yet by attaching the wheel to the other side of the arm, No. 17 can be used to hoe both sides of the row at once while the plants are small-the most import ant time.

For 1906 we offer our latest Wheel Hoes, as ths highest type of their class, superior to any of the old styles. They have the greatest variety of tools we have ever offered. These adapt the implements to a greater variety of crops, and to work at many different distances apart; there is scarcely any garden culture of which they are not capable.
The Handles are adjustable in height. The frame is convenient and strong, with quick change device, which permits the tools to be changed without removing the nuts. This device is used on both our double and single wheel hoe frames. The Wheel can readily be changed in height and to the far side of the frame to hoe "both sides at once."

PRICE, Complete.

PRICE, Complete. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 84.50
"PLANET JR." No. 16 COMBINED CULTIVATOR, PLOW AND RAKE. PRICE, $\$ 5.35$.

## THE "PLANET JR." TWELVE-TOOTH HARROW, Cultivator and Pulverizer. PRICE, Plain, $\$ 5.70$; with wheels, $\$ 6.90$; complete, $\$ 8.50$

This tool has grown remarkably in favor owing to its neatness and perfect work.
THE FARMER uses it in deep or close cultivation of potatoes, corn, etc., when small, or when desiring to work the crop thoroughly without filling.
THE STRAWBERRY GROWER, to keep the ground loose
and to work up and bed the runners; the roundthroated teeth lift them and turn them aside without injury; ready to root the mellow soil, which is thoroughly prepared by the nu-
merous small teeth.
THE BEAN RAISER uses it while the crop is small with the greatest satisfaction and benefit, and all through the season it is invaluable.

THE MARKET GARDENER finds it the most useful one-horse tool he owns. It narrows in an instant or widens. Cuts deep or shallow, is thorough but gentle in its action, steady running, and is useful everywhere.

## MITCHELL Potato Digger and Shovel Plow Combined.

 Price, Potato Digger, $\$ 6.50$. Combined with Shovel Plow, $\$ 8.50$.

## FIRE-FLY GARDEN PLOW.

Price, \$2.25.
Packed weight 13 lbs .

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted either into a SHOVEL PLOW, or POTATO DIGGER. The fingers are adjustable, being held in position by the plow point. Thus, in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are made of steel, rendering it light, strong and durable.

## THE "BOSS" PLOW.

This is the best one-horse convertible plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shares that come with the plow, the purchaser actually has four plows in one.

## DARNEL'S PATENT FURROWER AND MARKER.

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasinig the work instead of lessening it.

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.
We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow

We open two furrows, while he opens one in clean ground, and do it better.

## THE NEW MODEL SEED DRILL.

## The Most Perfect Drill in America.

## Price, $\$ 6.98$.

The record of the "New Model" has been so entirely satisfactory, and its place as one of the leading drills has become so firmly established, that we are almost tempted to discard the word "New." It is surprising to see how quickly it has been adopted by the seedmen and market gardeners as an old friend.

Price, plain, \$12.50.

## THE "BOSS' SOLID STEEL DRAG SCRAPER.

Pat. Nov. 4, 1897, and Mar. 24, 1885.

## Best and Cheapest Scraper in the Market.

No. 1. Capacity 7 cubic feet... $\$ 700$ No. 2. Capacity 5 cubic feet... 650

These Scrapers are made from heavy plates of especially hardened steel, and are stamped from one sheet without joint, seam or rivet. They are superior to any other Drag Scraper upon the market, the "Columbus" Solid Steel Scraper alone excepted. The bowl being made of thicker and harder steel, enables it to scour where no other Scraper will; and owing to the sharp, rounded nose, it will enter the ground more rapidly than any other make of Scraper. The Balls are steel, with perfect working swivels, and handles of hard wood. We will guarantee this Scraper in every particular. Made in three sizes.

Nos. 1 and 2 Scrapers Without Runners.

No. 351. Universal Bench Fold= ing Wringer. Improved.
We have recently greatly improved this Wringer by adding a Pressure Spring of Steel in the place of the three springs of wood as formerly made. Price, $\$ 4.25$.

DOUBLE GROUND LAND PLASTER, per ton, $\$ 7.50$; per bag, 45 c .
WHITE HELLEBORE, An excellent remedy against currant worms, rose slugs, caterpillars, etc. Can be used either dry or in water, 15 c . per pound.
WHALE OIL SOAP. One of the most effective agents used for destroying scale bug, plant lice and all other insects injurious to vegitation. Price, 1lb. box, 15 c .2 lb . box, 25 c .
STANDARD FLY AND GERM KLLLER. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. The Lightning Insect Exterminator No. 1 discharges the preparation in a fine, broad spray, without waste and using but very little. Fifty cows can be sprayed in a few moments, 50 c . per gallon.
HORICUM, THE GREAT SCALE KILLER. A remedy for the Scale that is the result of six years' experiment before being put on the market. Nothing better in use for the purpose. One gallon will make 21 gallons for use. 35 c . per quart; $\$ 1.00$ per gallon.

SULPHUR, POWDERED. A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

HAMMOND'S SLUG SHOT is an insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cabbage plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. 5 lb. pkg., 25 c.

"FRUITALL" SPRAY PUMP. "Fruitall" Spray Pump is made on the same general lines as the famous "Pomona;" it is, however, lighter and of smaller capacity. All working parts, including plunger, gland, valves, valve seats and strainer are made of bronze. Regularly fitted with wing agitator similar to one used on "Pomona", and which has proven to be the best type. Not made for side of barrel. Price, with hose complete, no barrel, $\$ 12.00$.
"PREMIER" BRASS BUCKET PUMP. The "Premier" is arranged with suction and discharge hose and spray nozzle. With this nozzle a solid stream may be thrown, or a fine spray. Pump has brass cylinder, plunger and rod. It is particularly adapted for washing windows and wagons, spraying plants in conservatories, greenhouses, etc. Its weight is only eight pounds.

Price, with $21 / 2$ feet $3 / 4$ inch suction and 3 feet $3 / 8$ inch discharge hose, "Seneca" Spray Nozzle and Strainer, $\$ 5.98$.
THE "BANNER" SPRAYER. This pump is made to stand a heavy pressure of air. riveted seams and double flanged heads. The pump is made of heavy brass and screwed into the center of the head with heavy brass screw threads. Will hold four gallons and is provided with brass nozzle that will throw a fine mist spray, or a solid continuous stream 50 feet high; also adjustable shoulder strap. Price $\$ 3.98$.

Sprayer No 21.

## LIGHTNING BARREL SPRAY PUMP No. 25.

 This pump has great capacity, and will throw a continuous stream, or any sized spray desired, by the use of our graduating nozzle. The air is compressed into the air chamber, thereby giving an unbroken stream, and making it the most rapid spraying pump made. The agitator thoroughly stirs the liquids and prevents the same from settling. It is adapted for all kinds of spraying, whitewashing, etc Price, $؟ 7.50$. (See cut.)"LIGHTNING", WHITEWASH SPRAYER. This is the only Spray Pump that will properly spray whitewash without clog. ging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chamber and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc. Galvanized iron, $\$ 2.50$; brass, $\$ 3.50$. (See cut.)

UTICA BLIZZARD SPRAYER.Handiest and easiest working Sprayer made. After filling three-fourths full and pumping in about ten strokes of air, a contiuous mist-like spray, is thrown which will last many minutest. Capacity 1 gallon. Price $\$ 1.50$.

CHAMPION DRY POWDER GUN For applying dry Paris Green Hellebore, etc., to plants and trees, the powder being evenly distributed over a wide space with the least possible waste. The quantity may be regulated as desired. Price, $\$ 7.50$.

LITTLE GIANT DRY POWDER GUN-Made upon the same principles as the Champion, doing equally as good work, but of less capacity. Price $\$ 5.00$.

Whitewash Sprayer.

## "POMONA" SPRAY PUMP.

"Pomona" Spray Pump has great power and capacity. No leather packings. All working parts are bronze, including plunger, gland, valves, valve seats, \&c. Plunger is outside packed. Valves are easily accessible for examination. Air chambers are steel. Powerful lever with adjustable stroke. Pump projects but little above the top of the barrel. Price with Barrel and Hose complete, $\$ 20.00$.
LIGHTNING ALL BRASS SPRAY PUMP.-This spray pump is constructed entirely of brass, so it is not affected by the arsinates used for spraying fruit trees, etc. The operator is enabled to keep a constant pressure of 50 to 100 pounds at the nozzle with very ordinary exertion. Will throw a solid stream 50 feet, or make a fine spray by adjustment of the nozzle. When spraying, a fine jet at the bottom keeps the solution thoroughly stirred. Price $\$ 3.50$.
COMPRESSED AIR SPRAYER No. 21.-Made of heavy galvanized iron, and is provided with a safety valve to prevent over pressure, 3 feet of best hose with spring faucet and nozzle which will throw a fine mist like spray, or a continuous stream 30 feet high. It will will spray ten acres of potatoes in a few hours, as it covers two rows at a time. Price $\$ 3.98$.
IMPROVED DOUBLE TUBE "LIGHTNING" INSECT EXTERMINATORS. -The Double Tube Exterminators have thrice the capacity of any other sprayer, ocvering a radius of $21 / 2$ feet, producing two large sprays with one operation. The reservoir filled with water and a teaspoonful of Paris Green is sufficient to kill 2,000 hills of potato bugs, which cannot be done with any other. No. 1 "Lightning" Tin Reservoir, 40c.; No. 20 "Lightning" Glass Reservoir, 59c.

The Sprinkler's mentioned below can be attached to our Hose, for which purpose we supply Free one pair of ouplings to every 25 or 50 feet of Hose purchased.

## THE 'WATER WITCH' LAWN SPRINKLER.

In constructing this device the main object was to produce a sprinkler that would scatter the water more evenly and over a larger area than would any other sprinkler. This purpose has been fully realized in the"Water Witch."

The water flows through the nozzle with unimpeded force, and is divided and deflected by the two lips of the swivel piece, which it causes to revolve rapidly scattering the water in fine drops and evenly over a circular area of twenty-five to forty feet diameter. No. 3. Price 38c.
COMET LAWN SPRINKLER. A perfect revolving three-arm Sprinkler that will cover a space
thirty to forty feet wide.

## THE BLANCHARD CHURN.

The body of the Churn being cylindrical, all the cream is churned alike and at the same time, making streak butter impossible. Those who desire to make butter on what is called the "granular system" can do it perfectly with the Blanchard Churn. If we were disposed to follow the example of some of our competitors, we could add page after page of "unsolicited" testimonials as to the accuracy of these claims; but we simply point to our past record and to the absolute guarantee under which all our sales are made.

## POULTRY AND PIGEON SUPPLIES.

We are headquarters for Poultry Supplies and would respectfully request those interested in this industry to give us a call. We handle only the best quality of goods, and, owing to the quantities in which we purchase, can sell at very reasonable prices. We herewith give a partial list of what we carry in stock:
CHICK STARTER - A Primary Food for Chicks up to 3 weeks old. A high grade mixture of sweet, sound, recleaned cracked grains and seeds-is similar to the Crescent Brand, but graded smaller, being more suitable for feeding little chicks.

50 lbs. \$1.50. 100 lbs. \$2.50.
CRESCENT BRAND CHICK FOOD-A Complete Food for Chicks up to 6 to 8 weeks old. High grade mixture of sweet, sound, recleaned grains and seeds, best adapted to chick feeding. This brand is offered as superior stock. A trial will demonstrate its excellent feeding quality.

50 lbs. \$1.50. 100 lbs. \$2.50.
DEVELOPING FOOD. A special food for properly maturing young chicks after they are weaned from Chick Food, and to properly carry them along to the age when it is desirable to feed the pullets scratching and laying food. Developing Foods dry grain food and may be fed from hoppers if desired, but better results may be accomplished by scattering broadcast so the chicks must work for it. This food solves a long-felt want for a grain food for half grown chicks, at which age they are too young to digest large grain. $50 \mathrm{lbs} ., \$ 1.15 ; 100 \mathrm{lbs} ., \$ 2.00$.
QUEEN POULTRY MASH. A carefully selected mixture of ground feed, manufactured from the choicest sound, sweet and wholesome grain. It is carefully prepared and contains ingredients in proper proportions essential to the health and growth of the fowl, and especially for the production of eggs. 50 lbs ., $\$ 1.50 ; 100 \mathrm{lbs} ., \$ 2.50$.
LAYING FOOD. A ground food ready for the mash, made up of carefully selected materials that will greatly increase the production of eggs. The use of this food will greatly increase the profits of the poultry raiser and cannot be too highly recommended. $50 \mathrm{lbs} ., \$ 1.15 ; 100 \mathrm{lbs} ., \$ 2.00$.
SCRATCH FOOD. For grown fowls, suitable at all seasons. A carefully selected and mixed balanced ration of grains, cracked and whole, seeds, etc., adapted to the vigorous growth of fowls and production of eggs. No better stock on the market-best value, considering both value and price. $50 \mathrm{lbs} ., \$ 1.15 ; 100 \mathrm{lbs} ., \$ 2.00$.
SPRATT'S PATENT POULTRY FOOD. A specially prepared and highly nutritious food, used at all the principal poultry shows all over the world. The most successful food for all kinds of poultry. 100 lbs., $\$ 6.00$.
ALFALFA MEAL. Most excellent to use with mash foods.
CUT ALFALFA. With its high percentage of protine no better substitute for green food can be found.
CUT CLOVER. For winter feeding. $50 \mathrm{lbs} ., \$ 1.00 ; 100 \mathrm{lbs} ., \$ 1.75$.
GROUND MEAT, best quality, $\$ 3.00$ per 100 lbs .

BOWKER'S ANIMAL MEAL. $\$ 2.25$ per 100 lbs .
KAFIR CORN, PIGEON PEAS, CRACKED CORN, WHEAT, BUCKWHEAT, ETC.
GROUND OYSTER SHELLS. 50c. per 100 lbs .
MICA CRYSTAL GRIT, fine and coarse.
POULTRY DRINKING FOUNTAINS. Stone, 1 qt., 20 c. 2 qt., 25 c .4 qt., 30 c .8 qt., 35 c .
CHAMPION LEG BANDS. Made of aluminum and adjustable to fit any fowl. 12 for 15 c .25 for 30 c. 50 for 50 c. 100 for 80 c.
TENNANT AUTOMATIC WHITEWASH SPRAYER. A practical and inexpensive pail pump for spraying coops, etc., with whitewash. Can also be used for disinfectants. All poultrymen should be supplied with one. Price, $\$ 2.50$.
POULTRY NETTING, LEG BANDS, PIGEON NESTS, WIRE HEN'S NESTS, NEST EGGS.

## BIRD FOOD AND SUPPLIES.

Canary, Rape, Hemp, Maw and Sunflower Seed, Cuttlefish Bone, Cages, Fountains, Bird Manna, Bird Bitters; Song Restorer, Gravel, etc.

## DON'T BLAME THE HEN-USE RUST'S EGG 'PRODUCER.

So exact are the proportions of Rust's Egg Producer that everything therein is utilized by fowls and nothing goes to waste. This makes it the most economical as well as the most perfect producer of eggs known, its cost being only one cent every two or three weeks, and this, when fed every day.

Eggs are often dear, but Rust's Egg Producer is always cheap. It pays to feed it all the year around, and the most enterprising poultry keepers do this. The most enterprising are the most successful in any business.

## F. W. MANN CO'S PATENT BONE CUTTER.

Are absolutely the first Bone Cutters ever sold to the public, and they are by far the most successful hand and poower machine on the market today for cutting up green bones.

## Corrugated Knives.

Our machine introduced for the first time corrugated knives of the finest tool steel, accurately tempered, which enable us to cut the hardest bone, either dry or fresh from the market, with ease and without injury to the knives. These knives retain a good cutting edge, without grinding, for two or three months of ordinary use. They are adjustable to cut finer or coarser, can be easily removed when dull, and can be sharpened on a common grindstone, the same as a carpenter's chisel.

Extra Heavy Boxes, for Milk Bottles, with Hinged Lid, removable inside partitions, to facilitate cleaning, will hold 12 quarts or 24 pints. Bottle Brushes. Dash Churns, all sizes. Prices from $\$ 1.49$.

## Window Screens and Screen Doors.

OUR FANCY SCREEN DOORS are handsome in design, being the result of study and combination. Without being overloaded with ornament, they are always pleasing to persons of correct taste.

They are strongly and carefully made from selected materals, glued together with the long corrugated dowels.

These doors are nicely finished, the doors being filled and varnished. They are firstclass.
PORTER FLYER WINDOW SCREENS. These are a great improvement upon the ordinary adjustable screens, having a strip of steel on the inner edges of the sections, thus keeping them close together whether opened to widest extent, or only part the way, absolutely preventing the entrance of insects. The frames are grooved and run on steel rods, making a firm frame and preventing the wracking so common in other makes.

Valance Patented May 21, 1889.
HAMMOCKS AND HAMMOCK ACCESSORIES. Our line of Hammocks this season is the most extensive we have ever shown. Prices ranging from 59 cents to $\$ 6.98$ each.

VUDOR PORCH SCREEENS. You will never know the real luxury, comfort and enjoyment to be had from your 'porch until you fit it with Vudor Porch Screens. They protect you from the sun, but the breeze passes through them. You see but are not seen. They will last for years, but are cheap in price.
They can be raised and lowered instantly and will remain at any point. It does not require a carpenter or awning man to put them up. You or your man can put them in position in few minutes, as they come completely equipped with plain directions with each shade.
TENTS. We handle a line of tents suitable for al purposes, made of Army duck, plain white and assorted stripes, from $5 \times 5$ feet upwards in size, complete with center pole and all attachments. Prices from $\$ 4.50 \mathrm{up}$.
